**Subject: Notice to commence Large Mining Operation HiCal
Mine M/023/071 Juab County, Utah.**

#1 R647-4-106 O.P.

106.6 All volcanic clay overburden will be removed and redistributed in mine pit then covered with top soil.

#2 Some of the top soil from the South end of the mine will be used for mind reclamation. Unused top soil will be piled on the East and West sides of the mine site for future reclamation. This soil will be reseeded until it is redistributed.

See maps

#3 When the crushing and stockpiling of travertine becomes obsolete or is moved to a new location, then the floor of the yard will be removed to the topsoil at that time the topsoil will be ripped and then reseeded.

R647-4-1110-R.P.

110.5 revegetation Planting Program

Recommendations of The BLM of Ladak Alfalfa, yellow sweet clover and blueflax, each at the rate of 0.5 pounds per acre of pure live seed will be added to seedmax.
